Policies:

- Labs will be conducted in groups of two, and discussions in groups of four. Please make sure all of your group members are working on the same page of the assignment.
- Please make sure to reference any outside sources you use. This includes textbooks (title, section title, and page number) and the internet (an url is acceptable).
- Be prepared for class. Bring all required materials to discussion and lab. This includes bringing your Lecture Tutorials book to every discussion.

- **Be on time!** We discuss important aspects of the labs and discussions at the beginning of each session. If you are late, you will miss these.
- Showing up on all the labs and discussions is an essential part of the course's requirement. We will be taking attendance.
- Email us about any *excused* absences in advance if possible. We will work something out for you to make up missed work. We are much more willing/able to help if you email us before the lab/discussion.

Academic Integrity:

See class syllabus for details.

You are free to cooperate with other students on assignments. However, make sure what you hand in is your own work in your own words. We are obligated to report any form of cheating and plagiarism to professor Veilleux and the school, so please do not force us to do so.

Rules:

1. If you have a question, ask it! Our job is to answer any questions you have no matter how big or how small. Chances are other students will have the same question.
2. If we don't know the answer, we will let you know or look it up for you. You are paying a lot of money to be here so you deserve to have your questions answered.
